These villas have two floors and offer the opportunity to live in a unique habitat; with Mediterranean forest on one side and situated at a privileged level overlooking the golf course.

Impact on the surroundings is minimised by a vertical architectural concept that delivers a living experience in harmony with nature.

The private pool at these villas appears to merge with the sky, like a balcony, giving a sense of continuity to the terrace facing the living room. The rooms inside the villa are full of light and the large windows enhance the feeling of spaciousness and enable occupants to submerge themselves in a natural, singular and privileged environment.

The villas have three bedrooms, a guest toilet room and two bathrooms, one of which is en suite and, as it opens out to the exterior, provides a very special bathing experience in harmony with the rest of the property. The master bedroom, located on the second floor, is complemented by a large dressing room and terrace.

The villas have an underground garage and storage room with direct access from inside and outside the property.
